

BRAND GUIDELINES

BRAND GUIDELINE

How to use this manual

02

This document is the operating system for how The Lamora Lagos looks, sounds and behaves as a brand.

It translates the hotel's current market positioning into a consistent identity across guest communications, digital channels, signage, collateral, uniforms, sales materials, food and beverage touchpoints, and corporate documents.

What this manual controls

- Brand strategy and personality
- Logo use, clear space and production discipline
- Official colour codes and accessibility
- Typography and layout hierarchy
- Graphic elements, iconography and pattern
- Photography direction and human storytelling
- Print, digital, guest and environmental applications
- Brand governance and vendor approval standards

Strategic statements in this manual have been developed from the current Lamora market positioning and should be formally ratified by ownership before they are treated as external corporate declarations.

INDEX

Contents

03

One brand. One standard. Every touchpoint.

01	Brand Strategy	04-10
02	Brand Logo	11-17
03	Brand Colours	18-21
04	Brand Typography	22-25
05	Brand Elements	26-28
06	Brand Photography	29-32
07	Brand Applications	33-35
08	Brand Governance	36-37

01 / BRAND STRATEGY

Luxury should feel personal before it feels impressive.

BRAND STRATEGY

Positioning

05

CURRENT MARKET POSITIONING

“A premium luxury lifestyle apartment hotel delivering privacy, exclusivity and personalised hospitality in the heart of Victoria Island.”

This positioning is the strategic anchor for the identity. The brand must communicate residential ease with hotel discipline: private rather than remote, refined rather than ostentatious, contemporary rather than trend-led, and personalised without becoming intrusive.

The Lamora should be recognised for

- Discreet luxury and a strong sense of privacy
- Personal recognition and intuitive service
- Contemporary Victoria Island relevance
- Design-led comfort suitable for short and extended stays
- Confident food, beverage and social experiences that can stand alone as Lagos destinations
- Professional reliability for corporate, diplomatic and executive travellers

BRAND STRATEGY

Vision & mission

06

BRAND VISION

To become Victoria Island's benchmark for private, design-led luxury apartment hospitality.

A place where discerning guests feel recognised, protected and entirely at ease - whether they stay for a night, a week or an extended period.

BRAND MISSION

To deliver personalised residential-style hospitality with hotel precision.

We combine privacy, thoughtful design, contemporary Lagos character and consistently intuitive service so that every guest experiences luxury as ease rather than excess.

BRAND STRATEGY

Audiences & guest mindset

07

The Lamora speaks to guests who value control of their time, privacy, quality and recognition.

Primary audiences

- Oil & gas executives and senior corporate travellers
- Embassy personnel and diplomatic delegations
- Long-stay expatriates and project teams
- Business travellers requiring a premium Victoria Island base

Secondary audiences

- Weekend leisure and premium staycation guests
- Destination restaurant and bar guests
- Premium social and private-event clientele
- Visiting families and guests seeking apartment-style flexibility

Shared mindset

They are time-conscious, digitally fluent and quality-sensitive. They notice details, dislike friction and respond to calm competence more than theatrical luxury.

BRAND STRATEGY

Brand values

08

Six principles should shape every operational and creative decision.

Discretion We protect privacy, use information responsibly and never confuse attentiveness with intrusion.	Personalisation We remember preferences, adapt intelligently and make the guest feel recognised rather than processed.
Refined Comfort Luxury is expressed through ease, quality, proportion, calm and thoughtful detail.	Contemporary Lagos We are cosmopolitan and locally grounded, expressing Lagos through confidence, culture and craft - not cliché.
Reliability Operational excellence, cleanliness, security, technology and consistency are part of the brand promise.	Thoughtful Responsibility We choose durable materials, reduce waste, respect people and build partnerships that strengthen the local ecosystem.

BRAND STRATEGY

Personality & brand promise

09

BRAND PERSONALITY

Refined. Assured. Warm. Discreet.
Contemporary. Human.

The Lamora should never appear loud, generic or self-congratulatory. Its confidence comes from precision, restraint and the quality of the guest experience.

Internal brand promise

Private. Refined. Personal.

This three-part promise is an internal decision filter: every service, design and communication choice should strengthen privacy, refinement or personal relevance - ideally all three.

Note: this is an internal brand promise, not a registered or externally approved tagline.

BRAND STRATEGY

Tone of voice

10

Quiet confidence. Clear language.
Genuine warmth.

Writing principles

- Use short, precise sentences and natural hospitality language.
- Prefer specific benefits over luxury clichés such as “world-class” or “unparalleled”.
- Address the guest as an individual; avoid corporate distance.
- Keep complaints and service recovery calm, accountable and solution-led.
- No official external tagline has been supplied. Until one is approved, use the hotel name and approved campaign copy rather than inventing a permanent slogan.

02 / BRAND LOGO

Our logo is the signature of the experience.
Protect it with discipline.

THE LAMORA LAGOS • BRAND GUIDELINES 2026 • 11

BRAND LOGO

Primary master artwork

12

Use the supplied Lamora master logo exactly as provided.

Master logo - vertical lockup

The master lockup combines the hexagonal L monogram, the small “THE” line, the LAMORA wordmark and the LAGOS location signature. These components are a single piece of artwork and must not be re-typeset, redrawn or separated casually.

The gold tone visible inside the current master logo is part of the supplied artwork. Because no separate approved gold colour code was supplied, it must not be sampled and introduced as an independent brand colour.

BRAND LOGO

Logo anatomy & hierarchy

13

The lockup carries four distinct recognition cues.

01

Hexagonal monogram

Primary mnemonic. Use as an app icon, favicon or small identifier only when an approved production asset exists.

02

THE + rules

A supporting signature line. Never remove, shorten or replace with plain typed text.

03

LAMORA

Primary wordmark and strongest verbal recognition element.

04

LAGOS

Location signature. Retain on the full master lockup to protect place recognition.

BRAND LOGO

Clearspace

14

Give the mark room to breathe.

Define X as the cap-height of the word LAGOS in the master artwork. Maintain at least 1X clear space on all four sides of the complete logo lockup.

No text, crop edge, decorative line, partner logo or photography detail may enter this zone.

BRAND LOGO

Minimum size & scaling

15

Protect legibility, especially the monogram and location signature.

Full master logo

Print minimum: 30 mm wide. Digital minimum: 160 px wide.

For guest-facing premium applications, use larger than the minimum wherever possible. The master logo is intentionally detailed and should never be treated as a tiny utility mark.

Monogram / icon only

Operational minimum: 12 mm print / 48 px digital, only from an approved icon asset.

Scaling rules

- Scale proportionally from a corner; never stretch horizontally or vertically.
- Do not compress the logo to fit a space. Change the layout instead.
- Do not crop the wordmark or LAGOS line.
- For embroidery, engraving and signage, request a vendor proof before production.

BRAND LOGO

Background applications

16

Contrast is part of the brand system.

Preferred treatment: use the official master artwork on a Lamora Navy field. On white or cream, place the master artwork inside a disciplined navy holding device until approved transparent or single-colour master files are issued.

On photography, avoid placing the detailed master artwork directly over texture or faces. Use a navy holding device with clear space.

BRAND LOGO

Co-branding & misuse

17

Partnership never means compromising the Lamora mark.

Co-branding

- Keep at least 1X clear space between The Lamora Lagos and any partner mark.
- Match partner logos by optical height, not by raw width.
- Use a thin separator rule only when needed; default to spacious separation.
- The Lamora logo should not be visually subordinate on property-owned communications unless contractually required.

Never

- Stretch, rotate, skew or compress the logo.
- Change the colours inside the supplied artwork.
- Apply shadows, bevels, outlines, glows or other effects.
- Re-typeset LAMORA or LAGOS to simulate the logo.
- Place the logo on busy photography without a holding field.
- Sample the logo gold and treat it as an approved palette colour.
- Create department logos by modifying the monogram.

03 / BRAND COLOURS

Three colours create a disciplined, recognisable luxury system.

BRAND COLOURS

Core palette

The Lamora colour system is intentionally restrained.

LAMORA NAVY

#072163

RGB 7 / 33 / 99
CMYK 93 / 67 / 0 / 61

LAMORA WHITE

#FEFEFE

RGB 254 / 254 / 254
CMYK 0 / 0 / 0 / 0

LAMORA CREAM

#FBEFC9

RGB 251 / 239 / 201
CMYK 0 / 5 / 20 / 2

These three codes are the approved brand palette for day-to-day production. Pantone references are not defined here because none were supplied; print vendors should colour-match to approved proofs rather than invent a conversion.

BRAND COLOURS

Colour roles & ratios

Navy leads. White creates space.
Cream brings warmth.

55%

Anchor / authority

30%

Space / clarity

15%

Warmth / accent

Lamora Navy - #072163

Primary brand anchor for backgrounds, headlines, signage, digital navigation, uniforms and high-recognition moments.

Lamora White - #FEFEFE

Primary breathing space for documents, menus, websites and operational clarity. Use generously.

Lamora Cream - #FBEFC9

Warm accent for hospitality, editorial panels, selected packaging, borders and subtle contrast.

BRAND COLOURS

Accessibility & contrast

21

Luxury must remain readable.

Approved high-contrast pairings

- Navy text on White - contrast ratio approximately 14.8:1.
- White text on Navy - approximately 14.8:1.
- Navy text on Cream - approximately 13.0:1.
- Cream text on Navy - approximately 13.0:1.

Avoid for body copy

White and Cream have insufficient contrast with each other for normal text. Use Navy for text whenever White and Cream are the surface colours.

Colour with photography

- Use a navy overlay or holding device when photo detail competes with text.
- Do not rely on colour alone to indicate status, error or action in digital interfaces.
- Maintain a minimum 4.5:1 contrast target for normal text and 3:1 for large text and essential interface elements.

04 / BRAND TYPOGRAPHY

Typography should feel editorial in expression and effortless in use.

BRAND TYPOGRAPHY

Typeface system

23

A high-contrast serif brings elegance; a clean sans serif brings precision.

DISPLAY TYPEFACE

EB Garamond

Elegant contrast, editorial character, understated luxury.

FUNCTIONAL TYPEFACE

NOTO SANS

Clear, modern and highly legible across print, web, signage and operational documents.

FALLBACKS

Garamond / Georgia for display; Arial / Aptos for functional copy where the preferred fonts are unavailable.

The logo lettering is custom artwork and is not a typography template. Never recreate the logo using the brand fonts.

BRAND TYPOGRAPHY

Hierarchy

24

Difference in scale should be deliberate, not decorative.

HERO HEADLINE / COVER

PRIVATE COMFORT, BEAUTIFULLY CONSIDERED.

SECTION HEADLINE

A more personal way to stay.

SUBHEADING

Luxury apartment hospitality in Victoria Island

BODY COPY

Use 9-11 pt for print body copy and a comfortable line length. Digital body copy should prioritise legibility and responsive spacing over rigid pixel matching.

LABELS / NAVIGATION

UPPERCASE • TRACKED • SHORT

BRAND TYPOGRAPHY

Layout & grid

25

Composition should feel calm, spacious and intentional.

Recommended grid

- Use 5-10% outer margins depending on format.
- Build vertical or landscape layouts on a flexible 6- or 12-column grid.
- Align text, imagery and rules to consistent hang lines.
- Preserve generous negative space; never fill a page simply because space exists.
- Use one dominant message per layout, supported by a clear secondary action.

Editorial rhythm

Prefer asymmetry with strong alignment: one large statement, one supporting image or block, and restrained functional detail. Do not centre every element by default.

05 / BRAND ELEMENTS

Geometry, restraint and repetition turn identity into a recognisable system.

BRAND ELEMENTS

Hexagon motif & pattern

The hexagon is the supporting geometry of the brand - not a replacement for the logo.

Pattern rules

- Use a simple hexagonal line motif inspired by the outer geometry of the monogram.
- Do not reconstruct or repeatedly tile the detailed L monogram itself.
- For backgrounds, keep pattern opacity light - generally 5-15%.
- Use Navy/Cream, Cream/Navy or Navy/White combinations only.
- Allow large fields of quiet space; the pattern is an accent, not wallpaper.

BRAND ELEMENTS

Iconography & graphic rules

28

Icons should be simple enough to disappear into the experience.

Icon style

- Single-line or lightly rounded geometric icons.
- Consistent stroke weight within an icon family.
- No cartoon styling, gradients or decorative 3D effects.
- Use Navy on light surfaces and Cream/White on Navy surfaces.
- Operational icons must prioritise recognition over brand flourish.

Rules, dividers and containers

Use thin navy rules, cream highlight panels and generous white space. Rounded rectangles may be used sparingly for digital actions, while print layouts should rely more on alignment and spacing than boxes.

Brand mark usage

Use the approved monogram only when a production-ready icon file is available. Do not trace the JPEG or create new derivatives for apps, signage or merchandise.

06 / BRAND PHOTOGRAPHY

Every image should make the guest feel the experience
before they arrive.

THE LAMORA LAGOS • BRAND GUIDELINES 2026 • 29

BRAND PHOTOGRAPHY

Photography principles

Optimistic. Authentic. Dynamic.

OPTIMISTIC

Warm natural light
Inviting human expressions
Calm confidence

AUTHENTIC

Real service moments
Natural styling
Tactile detail

DYNAMIC

Lagos energy
Architecture and movement
Unexpected perspectives

Use these three principles as a checklist for every commissioned image, social post, brochure and campaign. A photograph can express more than one principle at once, but it should never feel generic.

BRAND PHOTOGRAPHY

Principle: optimistic

31

Hospitality should look desirable without looking staged.

Capture

- Warm daylight or carefully controlled interior lighting
- Confident, relaxed guests rather than exaggerated poses
- Small signals of care: a table being set, a welcome, a quiet arrival
- Spaces that feel finished, clean and naturally inhabited
- Skin tones and materials rendered truthfully

Avoid

- Over-saturated sunsets or artificial luxury effects
- Empty rooms as the default visual language
- Forced champagne-toasts and generic celebration clichés
- Hard flash, cluttered frames and unflattering mixed lighting

BRAND PHOTOGRAPHY

Principles: authentic & dynamic

32

Show a real Lagos experience with editorial control.

Authentic

- Feature real staff, real service gestures and culturally current guests.
- Prioritise candid interaction over “look at camera” posing.
- Use Nigerian art, craft, food and design as lived context - never as decorative stereotype.
- Photograph textures, hands, details, preparation and the human side of service.

Dynamic

- Use architecture, reflections, movement and layered city views to introduce energy.
- Mix wide establishing frames with intimate crops.
- Show breakfast-to-evening transitions, pool terrace activity and destination dining moments.
- Keep composition sophisticated; dynamic does not mean chaotic.

07 / BRAND APPLICATIONS

Consistency becomes tangible in the things guests hold,
see and use.

BRAND APPLICATIONS

Print & corporate collateral

Corporate materials should feel as considered as the guest experience.

Logo

NAME SURNAME

GENERAL MANAGER

The Lamora Lagos
Victoria Island • Lagos, Nigeria
name@thelamoralagos.com
+234 (0) 000 000 0000

Core production set

- Business card: 85 × 55 mm, uncoated premium stock preferred.
- Letterhead: A4, generous top space, minimal footer information.
- Envelope: Navy or White with restrained logo placement.
- Proposal / sales pack: White-led interiors with Navy structure and Cream feature pages.
- Invoices, forms and operational documents: functional first, with light brand framing rather than decorative excess.

BRAND APPLICATIONS

Guest, digital & environmental

35

The identity must scale from a key card to a building sign.

Guest touchpoints

- Key cards, luggage tags, in-room directories, menus, amenity packaging, laundry bags and welcome cards should use the three-colour system consistently.
- Exterior and interior signage must prioritise legibility, illumination quality and durable fabrication.
- Uniform branding should be subtle. Use the approved mark only from production-ready artwork and keep embroidery small and precise.
- Where a metallic logo finish is specified for physical fabrication, match to an approved sample. Do not substitute an arbitrary gold paint or foil and call it a brand colour.

BRAND GOVERNANCE

Approvals & asset control

36

A luxury brand is protected through process, not preference.

Single source of truth

- Maintain one controlled folder containing the latest approved logo files, colour specifications, typography guidance, templates and vendor-ready artwork.
- File names should include brand, asset type, colourway, format and version date.
- Retire old artwork rather than leaving multiple “final” versions in circulation.

Approval levels

- Routine applications: Marketing / Brand custodian.
- Guest-facing permanent materials: General Manager + Brand custodian.
- External signage, façade branding and major campaign identity: Ownership / authorised executive approval.
- Any new logo variant, tagline or colour: formal brand approval before publication.

Vendor proofing

Always request a pre-production proof for print, embroidery, signage, packaging and branded merchandise. Approve colour, scale, placement and finish before bulk production.

BRAND GOVERNANCE

Quick reference

37

Before anything leaves the hotel, check five things.

1

Is the official Lamora master logo being used without alteration?

2

Are the colours limited to #072163, #FEFEFE and #FBEFC9, with logo gold treated as artwork only?

3

Is the typography elegant, clear and consistent with the hierarchy?

4

Does the communication feel refined, warm, discreet and personal?

5

Is there enough space, contrast and production quality for the application to feel premium?

Production asset gaps to close

For full rollout, commission a vector logo suite (AI/EPS/SVG/PDF), transparent PNGs, approved one-colour/reverse logo variants, a dedicated monogram icon file, Pantone or physical print colour references, and an approved external tagline if required.
